### Definition of Even Stop, Trail Stop, Price Exit Column

**Even Stop** - 1/3rd to 1/4th of the original position was closed at the exit price shown for profit and the rest of the position stopped out for break-even.

**Trail Stop** - The trade progressed past first target areas and stops moved per MACD 3 trade management and trail-stopped out for the profit shown.

**Price Exit** - Price hit a potential target or specified higher support/resistance area where we suggested as a take profit without waiting for a trail stop.
